Hazardous Materials in Schools

Hazardous materials include any substance or mixture of substances posing fire, explosive, reactive, or health hazards including a number of science laboratory chemicals and supplies, common school cleaning materials, spray oven cleaners, cleaning solvents, photo chemicals, soldering flux, some ceramic glazes, oils and gasoline.

The Director of Buildings and Grounds shall develop procedures to minimize the use of these materials in schools, including substituting, when possible, non-hazardous materials for hazardous materials and through minimizing amounts of hazardous material used and stored in the schools.

To the extent hazardous materials are necessary in educational programs or in school building maintenance, the Director of Buildings and Grounds shall develop procedures and practices on:

1. Identification and labeling of hazardous materials;
2. Use of hazardous materials;
3. Storage of hazardous materials;
4. Transportation of hazardous materials;
5. Disposal of hazardous materials;
6. Maintenance of material safety sheets in the building principal's office;
7. Chemical hygiene plans shall be maintained at all schools that have a science laboratory; and
8. Training of appropriate staff in procedures and practices enumerated in 1 – 7 above.

Procedures must comply with applicable local, state, and federal laws and regulations pertaining to safe and proper use, storage, transportation, and disposal of hazardous materials.

(cf. 5142 Student Safety)

(cf. 4147/4247 Employee Safety)
